

New Spritz by Fritz Painting Video

CKD readers know Fritz Schenck's custom paint work. Now you can learn Fritz's secrets. For the first time, Fritz has released a DVD that will include all the information anyone will need to learn to paint his own motorcycle in his own garage.

Fritz shows everything from building a paint stand to gold leafing, graphics and pinstripes without using any expensive tools. It's a unique approach to a "how to" video that is both informative and entertaining.

It is actually Fritz doing all the work in his own one car garage at home. Never before has a more down to earth interpretation of teaching been made available to the public.

Fritz has become a leader in custom paint as well as builds and restorations of cars and motorcycles. After writing for *Iron Horse* magazine for many years, he developed a following based on his ingenuity to do the work that so many make look so difficult, and show that it can be done using simple basics, hard work and know-how. Fritz was the painter for the Indian Larry Legacy shop and appeared on *Biker Build Off*. This DVD shows the exact method he used on so many bikes that he painted for Indian Larry and later for Paul Cox.

This DVD is the first in a series and retails for \$25 for a two DVD set that is almost 3½ hours in length.

Order online at www.spritzbyfritz.com or call 816-322-2205.

Steele Rubber Products

Peel-N-Stick Weatherstripping

Steele Rubber Products introduces Peel-N-Stick weatherstripping. With easy to use Peel-N-Stick adhesive backing, simply cut to size and fit to the areas you need to seal. Available in multiple lengths and a variety of extrusions, Steele Peel-N-Stick parts are made of the same quality sponge and dense rubber found in its standard rubber parts and

seals. Peel-N-Stick seals can be used around doors, windows, trunks and any place that needs protection from the elements.

Steele also manufactures reproduction rubber parts and weatherstrips for antique, classic, and street rod vehicles for many American makes including Buick, Cadillac, Chevrolet, GMC Trucks, Chrysler, Dodge, Ford, Oldsmobile, Pontiac, Packard, and other independents.

COMP Cams Ultra Pro Magnum rocker arms

The original Pro Magnum stud mount rocker arm design has been the standard of the industry for almost 20 years, but recent advancements in design capabilities and steel casting processes have paved the way for a "clean sheet" redesign.

The most noticeable advancement with the COMP Cams Ultra Pro Magnum Rocker Arms centers around their nearly unbreakable investment cast 8650 chromemoly body. The arched, web-like design delivers a nearly

29 percent increase in strength and rigidity while reducing the moment of inertia and optimizing the dynamic balance.

The resulting rocker maximizes lift and valve train control at high rpm. The increased retainer and valve spring clearances of the new design enable the use of large diameter valve springs, retainers and locks without clearance or fitment issues. As further testament to the strength of this design, COMP Cams includes a lifetime guarantee against the breakage of the rocker arm body for any reason. The black oxide exterior finish offers a distinctive appearance with long term corrosion resistance.

COMP Cams Ultra Pro Magnum Rocker Arms are available for most popular Chevy and Ford performance engine applications that utilize stud mount rockers arms.

Info: www.compcams.com; 800-999-0853, 901-366-1807; COMP Cams, 3406 Democrat Rd., Memphis, TN 38118.

EGGE 1946-53 Flathead Ford 239 pistons

Do you have a Ford Flathead in the shop? Egge's E-135 1946-53 Flathead Ford piston features a four ring set-up. Machined from A-332 high silicone aluminum, the E-135 features a precision milled and gusseted pin boss for strength and durability.

All Egge pistons are made in America at its facilities in Santa Fe Springs, California, and include a chromium wrist pin. Order a set of eight pistons, or the internal components for an entire engine rebuild with a quick call to your Egge Engine Parts Experts.

Egge also provides oil, fuel and water pump remanufacturing, babbitt bearing and align-bore services. Egge is the leading global distributor of nostalgic performance and internal engine components for brass-era to late 1970s engine applications.
